OUANDE Ibourahima, Inspecteur de l'enseignement secondaire

PREFACE

L'école, à travers l'éducation qu'elle offre, est le lieu où se forment les valeurs humaines indispensables pour le développement harmonieux d'une nation. Et l'éducation de qualité constitue un défi que toutes les nations doivent relever car elle confère à l'individu son statut d'être humain à part entière, c'est-à-dire autonome, intègre et acteur-riche de changement positif.

Le relèvement d'un tel défi exige la mise à contribution de tous les facteurs, tant matériels qu'humains. C'est pourquoi, le gouvernement du Burkina Faso, à travers le Ministère de l'Education nationale, de l'Alphabétisation et de la Promotion des Langues nationales (MENAPLN) s'est toujours préoccupé de doter les enseignant.e.s d'outils devant les orienter dans leurs actions pédagogiques quotidiennes.

Le guide d'exploitation des curricula a été élaboré dans ce cadre, dans un contexte de relecture des curricula de l'enseignement post-primaire et secondaire selon l'Approche Par les Compétences-Pédagogie de l'Intégration (APC/PI).

C'est le lieu pour moi de remercier vivement nos partenaires du Projet d'Appui aux Réformes institutionnelles et techniques pour l'Equité (PARITE) ainsi que tous les acteurs qui ont œuvré à la réalisation dudit guide. C'est un outil d'aide à la conception de l'intervention pédagogique et c'est avec une grande fierté que nous le mettons à la disposition des enseignant-e-s, à qui nous souhaitons un bon usage.

Le Ministre

AVANT PROPOS

Dans le cadre de la mise en œuvre de sa politique éducative, le Burkina Faso s'est engagé depuis mars 2013 dans un vaste chantier de réforme curriculaire de l'éducation. La réforme trouve son fondement dans la loi n°013-2007/AN du 30 juillet 2007 portant loi d'orientation de l'éducation.

Cette réforme repose sur une volonté politique d'apporter des améliorations significatives à notre système éducatif dans le sens de le rendre plus performant et plus pertinent tout en tenant compte des spécificités nationales. Pour une exploitation judicieuse des nouveaux curricula, il est apparu nécessaire de disposer dans les classes, des guides d'exploitation desdits curricula. Le présent guide, construit pour permettre aux enseignant-e-s d'exploiter les curricula conçus selon l'Approche Par les Compétences (APC) répond à cette préoccupation. Il est destiné à faciliter le travail de l'enseignant-e en lui expliquant les composantes des curricula, les méthodes et techniques utilisées dans l'enseignement-apprentissage de l'anglais, la démarche méthodologique illustrée par les canevas des fiches pédagogiques et des exemples de fiches pédagogiques. Des indications sur les méthodes d'évaluation selon l'APC ont aussi été données.

Ce guide s'articule autour de quatre grandes parties qui sont :

- partie 1 : Commentaire explicatif de concepts clés des curricula.
- partie 2: Indications pour la préparation du cours d'anglais au secondaire général
- partie 3 : Canevas et exemples de fiches pédagogiques
- partie 4 : L'évaluation selon l'APC

En utilisant ce guide, les enseignant-e-s peuvent améliorer la qualité de l'enseignement-apprentissage, et aider les élèves à développer les compétences dont ils ont besoin pour réussir dans le monde réel.

Les auteurs

INTRODUCTION

La réforme curriculaire au post-primaire et au secondaire a tenu compte des engagements du Burkina avec ses partenaires dans la perspective de la création d'un diplôme unique du baccalauréat pour l'ensemble des pays membres de l'UEMOA. La réforme du baccalauréat étant ancrée sur l'approche par les compétences (APC), elle a exigé l'élaboration des nouveaux curricula.

La réécriture des curricula selon l'APC offre une opportunité d'opérationnaliser un des objectifs poursuivis par l'enseignement de l'anglais qui est l'intégration des habiletés de la langue en vue d'amener les apprenants à communiquer efficacement en anglais. En outre, à travers le développement des compétences, l'enseignement-apprentissage prenant en compte les fonctions langagières se trouvera renforcé.

L'atteinte de ces objectifs exige une bonne utilisation des curricula. C'est en vue d'aider les enseignants à s'approprier les nouveaux curricula que le présent guide a été élaboré.

PARTIE I : COMMENTAIRE EXPLICATIF DES CONCEPTS CLES DES CURRICULA

1. Le profil de sortie

Un profil de sortie est l'explicitation de l'image attendue de l'élève au terme d'un niveau de la scolarité, telle qu'elle est issue de la commande sociale. Il repose sur des valeurs (finalités). Le profil de sortie en anglais précise ce qui est attendu de l'élève dans la discipline au terme de chaque ordre d'enseignement (post-primaire et secondaire).

2. Les compétences terminales

Une compétence c'est la faculté pour une personne de mobiliser un ensemble de ressources pour faire face à une situation complexe (Roegiers, 2010).

Les compétences terminales en anglais sont définies pour chaque ordre d'enseignement (post-primaire et secondaire).

3. Les compétences intermédiaires

Une compétence est dite intermédiaire quand elle n'est pas pleinement constitutive d'un profil de sortie. Elle porte sur une étape intermédiaire dans sa construction vers la compétence terminale. En anglais, les compétences intermédiaires ont été définies par classe.

4. Les contenus ou ressources

Une ressource désigne l'ensemble des savoirs, savoir-faire, savoir-être, savoirs d'expérience... que l'apprenant mobilise pour résoudre une situation. Les ressources dépendent de la situation posée, mais sont aussi relatives au processus qu'un apprenant va mobiliser pour résoudre une situation problème.

5. Les paliers de compétences

Un palier est un ensemble d'activités d'apprentissage correspondant à une séquence. Il englobe un certain nombre de séances d'apprentissage qui est fonction du nombre de ressources nécessaires à une action d'intégration suivie d'une action d'évaluation par rapport à une compétence donnée.

C'est un niveau intermédiaire de l'atteinte d'une compétence. Il se définit donc sur la base de contenus de plus en plus complexes.

6. Les outils d'accompagnements

Les outils d'accompagnements sont des informations mises à la disposition de l'utilisateur des curricula pour l'aider à la bonne mise en œuvre de ces derniers. Ils comprennent le tableau de planification détaillée par classe, les orientations épistémologiques et didactiques, les situations d'intégration et les grilles de correction critériée.

PARTIE II : INDICATIONS POUR LA PREPARATION DU COURS D'ANGLAIS AU SECONDAIRE

1. ORGANISATION /PROCESSUS GENERAL

Les curricula du secondaire sont constitués de huit ((8) unités thématiques par classe. Chaque unité comprend des séances d'apprentissage (learning sessions), une ou des séances de consolidation (consolidation session) et une séance d'intégration (problem-solving session).

En fonction de la durée de l'unité, on veillera à équilibrer l'enseignement des quatre skills et des deux subskills en lien avec le thème central de l'unité.

2. HOW TO TEACH A UNIT

During the learning sessions, learners will acquire the resources (vocabulary, grammar, etc.) that they will need to mobilize in the consolidation and problem-solving sessions.

The consolidation session, implemented at the end of each lesson, will cover different aspects dealt with in the entire lesson.

The problem-solving session, implemented at the end of each unit, will cover different aspects dealt with in the entire unit.

In order to promote the communicative language teaching, the linguistic contents (grammar/structures & vocabulary/lexis) are taught according to the functions aimed at. In this respect, we only need to select key and repetitive items/contents that are necessary to realize the function(s) instead of spending a whole hour time teaching either item (vocabulary or grammar) without the function(s). In a nutshell, functions, vocabulary and grammar are tied together in a whole

2.1. Organization of teaching/learning in a 12-hour unit

Note: the 12-hour unit organization corresponds to:

- ***the months of October, November, January, February and April for 2nd A & C, 1ere A, C & D, Terminale C & D classes.***
- ***the months of December and March for Terminale A class.***

Units	Sessions	Duration	
Unit	Learning session 1	1 h	7 h
	Learning session 2	1 h	
	Learning session 3	1 h	
	Consolidation session	1 h	
	Learning session 4	1 h	
	Learning session 5	1 h	
	Consolidation session	1 h	
	Problem solving session	1 h	1 h
Evaluation		2 h	2 h
Remediation		2 h	2 h
			12 h

2.2. Organization teaching/learning in a 9-hour unit

Note: The 9-hour unit organization corresponds to the months of December and March for 2nd A & C, 1ere A, C & D, Terminale C & D classes.

Unit	Learning session 1	1 h	4 h
	Learning session 2	1 h	
	Learning session 3	1 h	
	Consolidation session	1 h	
	Problem solving session	1 h	1 h
Evaluation		2 h	2 h
Remediation		2 h	2 h
			9 h

2.3. Organization of teaching /learning in a 6-hour unit

Note: the 6-hour unit organization corresponds to the month of May:

- problem solving sessions for 2nd C, 1ere C & D, Terminale C & D classes.
- learning sessions for 2nd A and 1ere A classes.

Unit	Problem solving session 1 / Learning session 1	1h	2 h
	Problem solving session 2 / Learning session 2	1 h	
Evaluation		2 h	2 h
Remediation		2 h	2 h
			06 h

2.4. Organization of teaching /learning in a 16-hour unit

Note: the 16-hour unit organization corresponds to the months of October, November, January, February and April for Terminale A class.

Unit	Learning session 1	1 h	11 h
	Learning session 2	1 h	
	Learning session 3	1 h	
	Consolidation session	1 h	
	Learning session 4	1 h	
	Learning session 5	1 h	
	Learning session 6	1 h	
	Consolidation session	1 h	
	Learning session 7	1 h	
	Learning session 8	1 h	
	Consolidation session	1 h	
	Problem solving session	1 h	1 h
Evaluation		2 h	2 h
Remédiation		2 h	2 h
			16 h

2.5. Organization of teaching /learning in an 8-hour unit

Note: The 8-hour unit organization corresponds to the month of May for Terminale A classes.

Unit	Learning session 1	1 h	3 h
	Learning session 2	1 h	
	Consolidation session	1 h	
	Problem solving session	1 h	1 h
Evaluation		2 h	2 h
Remediation		2 h	2 h
			8 h

PARTIE III: LESSON PLAN FRAMEWORKS AND EXAMPLE OF LESSON PLANS

1. LESSON PLAN FRAMEWORKS

1.1. Learning session framework

Phases	Purpose	Lesson steps and timing	Teacher's activities	Student's activities	Remarks
DISCOVERY PHASE 30 mn	1. Introductory stage 15 mn				
	Creating a stress-free atmosphere	Warming up (03 mn)	-greet; -asks date -initiates a song, poem, game, anecdote, tongue twisters, slam -tells a joke - uses physical expressions/ movements	-answers questions -performs tasks	
	Making the link between the previous lesson and that of the day	Reviewing previous lessons / prerequisites (05 mn)	- asks questions - makes students correct homework	-answers questions -performs tasks	
	Preparing the students to engage in the lesson and arousing their	Introducing the activity and the learning context (07 mn)	- conducts a lead-in activity - presents the learning context (oral explanation, video, audio, songs,	- observes / watches / listens ... - performs tasks	

	interest in the day's lesson		images) - announces the lesson		
	2. Input stage 15 mn				
	Presenting the new language item (s) to acquire and / or the skill(s) to develop	Grammar, vocabulary and skills can be taught as separate subskill or skill. However, it is highly recommended to present them in an integrated way whenever possible. (15 min)			
		Presenting the new vocabulary items	presents the new words or phrases in context (using realia, pictures, mimes, definitions, explanations, synonyms, antonyms, questioning).	-listens and repeats chorally, in rows and individually -observes and reads new vocabulary items	Teacher writes model sentences on board.
		Presenting the new grammar item (s)	teaches grammar inductively (eliciting examples and getting the students draw the rules).	- produces and/or observes and analyses the examples; -draws the rules.	The grammar item (s) can also be taught deductively if necessary (going from the rules to the examples).
		Presenting the skill and activities (listening, speaking, reading or writing)	helps the students to familiarise with the tools necessary to perform the tasks. (the tools and the tasks will vary according to the skill taught)	-observes -analyses -listens -responds -performs tasks	
	3. Manipulation stage 15 mn				

PRACTICE PHASE 15 mn	Involving the learners in practice activities to allow them to acquire the new language item(s) and / or to develop the skill(s)	Controlled activities (07 mn)	-engages students in controlled activities (the type of activities will vary according to the skill taught).	performs the task.	Activities here are those for which there is only one correct answer: -gap filling -MCQs, -matching -true/false -picture labelling -changing forms, -etc.
		Semi-controlled activities (08 mn)	-engages students in semi-controlled activities (the type of activities will vary according to the skill taught).	performs the task.	Activities here are those with possibilities of different good answers: -finish the sentence -write a sentence under the picture -limited response questions ...
- Follow up/Homework (3 mn)			assigns a homework activity.	copies the homework	
- Copying and executing administrative tasks (7 mn)			- indicates what to copy	Copies	
			-checks attendance -fills in the record book	answers the roll-call	

1.2. Consolidation session framework

2. EXAMPLES OF LESSON PLANS

2.1. Learning session lesson plan

READING COMPREHENSION

Text: Computer.

A Computer is an electronic programmed device with a set of instructions allowing it to perform specific tasks and generate results at a very high speed. It is derived from a Latin word “computare” which means “to calculate”, “to count”, “to sum up” or “to think together”. So, more precisely the word computer means a "**device that performs computation**".

Today, the computer is used in every field and has made our day- to- day tasks very easy. Computer has made a very vital impact on society. It has changed the way of life. The use of computer technology has affected every field of life. People are using computers to perform different tasks quickly and easily. The use of computers makes different tasks easier. It also saves time and effort and reduces the overall cost to complete a particular task.

Many organizations are using computers for keeping the records of their customers. Banks are using computers for maintaining accounts and managing financial transactions. The banks are also providing the facility of online banking. The customers can check their account balance from using the internet. They can also make financial transaction online. The transactions are handled easily and quickly with computerized systems.

People are using computers for paying their bills, managing their home budgets or simply having some break and watching a movie, listening to songs or playing computer games. Online services like skype or social media websites are used for communication and information sharing purposes.

Computer can be used as a great educational tool. Students can have access to all sort of information on the internet. Some great websites like Wikipedia, Khan’s Academy, Code Academy, Byte-Notes provides free resources for students & professionals.

Moreover, the computer is being used in every field of life such as medical, business, industry, airline and weather forecasting.

Class 1e C

Class size Boys: Girls:

Attendance

Learners with special needs

Competence (*Compétence intermédiaire*): Lire et comprendre un texte standard de 350 à 400 mots, adapté au niveau de la classe, sur la problématique des thèmes émergents et d'autres en rapport avec l'environnement national et international en s'appuyant sur les textes authentiques, les aspects linguistiques et les résolutions de situations problèmes liés à ces thèmes.

Unit: Computers

Lesson: Reading comprehension

Title: Computer

Type of session: learning session

Language main skill: Reading comprehension **integrated skill (s):**

Language function (s): Expressing purpose

Objectives: to be able to answer comprehension questions related to the theme of computer

Methods / Techniques: individual and pair work

Teaching aids/Materials: hand-outs, chalk, duster, board.

Duration: 55 minutes

DISCOVERY PHASE (30 mn)

I) Introductory stage (15 mn)

Step 1: warm up (3mn)

- Greeting
- Date asking and writing

Step 2: Revision of the previous lesson or pre-requisites. (5 mn)

Step 3: introducing the lesson and learning context (situation d'apprentissage) (7 mn)

- Lead-in activity

Teacher: What technological device helps students to study today?

(Expected answers: computer, phones, radios, TV)

- Learning context

Your cousin has received a computer and needs to know how the device can help him/her in his/her studies.

You decide to look for information on how the computer helps students in their training.

- Lesson announcement

Teacher: Today, we are going to do a reading comprehension lesson; we are going to study a text entitled: Computer

II) Input stage (15 mn)

Presenting some tools necessary to perform the task related to the skill and activities.

Language review

Vocabulary (7 mn)

Teacher asks students to guess 3 words or expressions that are likely to be found in the text.

Teacher proposes *device*, *computerized systems*, *browse*, *social media website*, *tools*, *task*, *weather forecasting*, *Facebook*, in addition to the proposals of the students.

Teacher gives out the text, asks students to read it and check their predictions and teacher's proposals.

Teacher asks the students to read the text and guess from context the meaning of the following words and expressions he proposed : *device*, *computerized systems*, *social media website*, *tools*, *task*, *weather forecasting*.

Grammar (5 mn)

Teacher proposes the following sentences :

*Many organizations **are using** computers **for keeping** the records of their customers.*

*Many organizations **use** computers **to keep** the records of their customers.*

Teacher asks learners to draw the structures of the proposed sentences.

Use + noun + for + verb + -ing

Use + noun + to + verb

Teacher asks learners to give the use of the structures.

The structures are used to express purpose.

Teacher asks learners to find in the text sentences having a similar construction.

Guiding question (3 mn)

Teacher: Read the text and tell the main idea of the text.

Correction of the guiding question

Pupils: The text deals with the advantages of the computer.

PRACTICE PHASE (15 min)

Manipulation stage

Step 1: Controlled activities (7 min)

Activity 1 (3 min)

Instruction: *Read the text and say whether the statements are true or false.*

1. A computer provides information for executing any task.
2. A computer is used to perform many tasks.
3. The computer has harmful impacts on society.
4. A computer can be used in the domain of health.

Correction

Expected answers

1-F 2-T 3-F 4-T

Activity 2 (4 min)

Instruction: *Read the text and discuss in pairs to fill in the gap with the appropriate words.*

1. A computer is device. (a different, an electronic, a financial)
2. The computer has facilitated our daily... (budget, life, task)
3. Computers are used in banks for aspects (financial, particular, medical)
4. To have some information on the internet, we can use ...like Byte –Notes (computers, websites, media)

Correction

1-electronic 2-task 3-financial 4-websites

Step 2: Semi-controlled activity (8 minutes)

Activity 3 (5min)

Instruction: *Read the text again and write the answers to the following questions.*

1. In which domains of activities are computers used ? (Propose three domains)
2. What are two ways in which computer has affected the financial domain?
3. Give three sites where pupils can find free information.

Correction and assessment (3mn)

Expected answers

1. Computers are used in medicine, business, industry, airline, weather forecasting, education, communication
2. Computer permits to banks to maintain accounts and manage financial transactions. It also facilitates online banking. In addition, it permits customers to check their account balance.
3. Pupils can find free information on websites like Wikipedia, Khan's Academy, Code Academy, Byte-Notes.

The teacher praises the pupils who did well, encourages the others and gives them hints to do better next time.

Follow up (3mn)

Instruction: In a piece of writing of about 80 words say how the computer can be useful to the pupils of scientific schools.

COPYING AND EXECUTING ADMINISTRATIVE TASKS (7mn)

- Students take the correction of wh-questions and the follow-up task.
- The teacher fills in the record book, checks the pupils' attendance and congratulates students for their participation.

2.2. Consolidation session lesson plan

Date

Teacher's name

Provincial directorate **School:**

Class 1e C

Class size **Boys:** **Girls:**

Attendance

Learners with special needs

Competence (*Compétence intermédiaire*) : *Ecrire un texte (descriptif, explicatif, argumentatif, narratif) cohérent et compréhensible d'environ cent vingt (120) mots sur de sujets de la vie courante en mobilisant les techniques d'écriture et les ressources linguistiques appropriées.*

Unit: Computers

Lesson: Paragraph writing

Title: Computer

Type of session: Consolidation session

Language main skill: Writing **integrated skill (s):**

Language function (s): Writing an argumentative paragraph

Objectives: to be able to write a paragraph of 120 words to point out three advantages of the use of computer in education.

Methods / Techniques: individual and group work

Teaching aids/Materials: chalk, duster, board.

Duration: 55 minutes

I. PREPARATION (3mn)

Warm up – Greeting

- Date asking and writing
- Song by students

II) TASK SETTING (5mn)

Conducting preliminary activities

1. Teacher brings the learners to recall what has been seen in learning sessions.

2. Organize students in groups of five.
3. Teacher sets activity (Teacher describes the context, gives clear instructions, sets assessment criteria, and sets a time limit for doing the task).

- **Activity context**

Today, we are going to do a writing activity related to the topic of “computers”.

The Regional Director is visiting your school. You have been chosen to deliver a speech as a representative of the students. Basing on what you have studied in the learning sessions about computers, prepare your speech.

- **Instructions**

1. Discuss in groups to gather ideas on the importance of computers
2. Individually, write a paragraph of 120 words to point out three advantages of the use of computer in education to convince the government to provide pupils with computers.

- **Appreciation indicators**

Your piece of writing should:

- respect the format of a paragraph;
- use appropriate linking words;
- contain solid arguments;
- use appropriate vocabulary;
- use appropriate grammar;
- be clean and legible.

- **Expected production**

Providing pupils with computers offers several advantages that significantly improve education. First, computers facilitate access to a lot of information and educational resources, permitting students to get ideas which are not in traditional textbooks. Second, they promote interactive and motivating learning through educational software and applications, which can satisfy various learning styles and improve student comprehension. Third, computers prepare students for the digital age. They provide them with essential technological skills needed for future employment. To conclude, we propose the government to invest in computers for pupils. It will be a productive investment as it will help better prepare them academically and professionally. That will create a qualified workforce for the development of our country.

III) TASK EXECUTION (20mn)

Students perform task and teacher monitors.

IV) PERFORMANCE (20mn)

1. Presenting the results (15 mn)

Students perform task while teacher listens to their production, takes notes and writes down recurrent mistakes or irregularities to correct after their performance. *Teacher need not interfere in students' performance unless there is a disruption/distortion in meaning.*

2. Providing feedback (5 mn)

Teacher helps Students improve final productions (language + ideas)

V) COPYING AND EXECUTING ADMINISTRATIVE TASKS (7 mn)

- Teacher indicates what to copy: *the activity context at the **task setting part** and one sample production from students.*
- He checks attendance and fills in the record book.

2.3. Problem-solving lesson plan

Date

Teacher's name

Provincial directorate **School:**

Class 1e C

Class size **Boys:** **Girls:**

Attendance

Learners with special needs

Competence *Compétence intermédiaire) : S'entretenir avec des locuteurs de la langue sur des sujets de vie courante en utilisant les ressources linguistiques appropriées et des techniques de persuasion.*

Unit: Computers

Lesson: -

Title: -

Type of session: Problem solving session

Language main skill: Speaking **integrated skill (s):**

Language function (s): Sensitizing, persuading

Objectives: to use resources acquired to persuade students to the usefulness of computers.

Methods / Techniques: individual

Teaching aids/Materials: hand-outs, chalk, duster, board, (microphone).

Duration: 55 minutes

I. PREPARATION (3mn)

Warm up

- Greeting
- Asking and writing date
- Word game (word chain)

II. TASK SETTING (5mn)

Conducting preliminary activities

1. Teacher brings the learners to recall what has been seen in the unit.
2. Teacher instructs students to work individually.

3. Teacher sets activity (Teacher sets the communication situation and the communication problem, gives clear instructions, sets appreciation criteria, and sets a time limit for doing the task).

- **Situation of integration**

One day, when going home after classes, you hear two students of 2nd C say that computers are luxurious devices that are not important for them. You are a student of 1^e C and you consider that many of their classmates may share the same view. As a result, you decide to sensitize them to the benefits of computers for high school students.

Basing yourselves on the documents studied in relation to computers, your knowledge on the argumentative paragraph, grammar, vocabulary related to the same topic, and your own experience, you decide to deliver a three-minute oral presentation to the students of 2nd C.

In 20 minutes, write down the ideas you will develop in your talk. In the presentation you will:

- give a definition of the computer;
- point out three advantages of the use of computers;
- explain two important ways in which computers can help students in their studies.

Face the audience and speak in an audible voice during your presentation.

- **Appreciation criteria**

Your presentation should:

- contain convincing arguments;
- be well organised;
- be delivered through an acceptable pronunciation;
- be delivered fluently;
- use appropriate vocabulary;
- use appropriate grammar;
- be audible.

III) PROBLEM SOLVING (20 mins)

Students execute task and teacher monitors, helps if necessary.

IV) PERFORMANCE (20mn)

1. Presenting the results (15 mn)

Students perform task while teacher listens to their productions, takes notes and writes down recurrent mistakes or irregularities to correct after their performance. Teacher need not interfere in students' performance unless there is a disruption/distortion in meaning.

2. Providing feedback (5 mn)

Teacher helps students improve final productions (language + ideas)

V) COPYING AND EXECUTING ADMINISTRATIVE TASKS (7 mn)

- Teacher indicates what to copy: the activity context at the task setting part and one sample production from students.
- He checks attendance and fills in the record book.

Criteria-based marking grid (Grille de correction critériée)

Criteria Instructions	Pertinence (Instruction executed)	Language accuracy (grammar, vocabulary and pronunciation)	Coherence (relevance of ideas + logical organisation of the task executed and/or fluent performance)	Refinement criteria (overall presentation)
Instruction 1: Give the definition of a computer	Indicator 1: A speech is performed /0.5 pt Indicator 2: A definition is given. /0.5 pt	Indicator 1: Appropriate grammar is used / 0.5 pt Indicator 2: Appropriate vocabulary is used / 0.5 pt Indicator 3: Appropriate pronunciation is used/1 pt	Indicator 1: The good definition is given /1 pt Indicator 2: The speech is well organized and convincing /1 pt Indicator 3: The speech is delivered fluently/1 pt	Indicator 1: The speaker faces the audience / 1 pt
Instruction 2: Point out three advantages of the use of computers	Indicator 1: A speech is performed /0.5 pt Indicator 2: three (3)	Indicator 1: Appropriate grammar is used / 0.5 pt Indicator 2: Appropriate	Indicator 1: The advantages given are relevant /1 pt Indicator 2:	Indicator 2: The speech is delivered in a loud and audible voice /1 pt

	advantages of the use of computers are provided /0.5 pt	vocabulary is used / 0.5 pt Indicator 3: Appropriate pronunciation is used/1 pt	The speech is well organised and convincing /1 pt Indicator 3: The speech is delivered fluently/1 pt	
Instruction 3 : explain two important ways in which computers can help students in their studies	Indicator 1: A speech is performed /0.5 pt Indicator 2: two (2) important ways in which computers can help students in their studies are provided /0.5 pt	Indicator 1: Appropriate grammar is used / 0.5 pt Indicator 2: Appropriate vocabulary is used / 0.5 pt Indicator 3: Appropriate pronunciation is used/1 pt	Indicator 1: The important ways given are relevant /1 pt Indicator 2: The speech is well organised and convincing /1 pt Indicator 3: The speech is delivered fluently/1 pt

PARTIE IV: L'EVALUATION SELON L'APC

1. LES DIFFERENTS TYPES D'EVALUATION

L'enseignant doit privilégier les évaluations formatives sans pour autant occulter celles sommatives. Ces évaluations doivent être en congruence avec les objectifs d'apprentissage élaborés par l'enseignant qui découlent eux-mêmes des objectifs et des contenus définis dans ce curriculum.

L'évaluation formative est permanente car elle comprend aussi bien les évaluations faites à la fin de chaque leçon, que les évaluations-remédiation, et les situations d'intégration. Il faut réaliser une (01) situation d'intégration après chaque unité.

L'évaluation formative doit privilégier l'auto-évaluation et l'évaluation par les pairs. Mais, qu'elle soit formative ou sommative, l'évaluation doit toujours être critériée afin d'être objective et promouvoir la culture de la réussite.

Dans les curricula, les situations d'intégration prévues à la fin de chaque unité sont formatives. En outre, les premières évaluations du trimestre sont des évaluations classiques et les dernières, des situations d'intégration sommatives.

2. LA SITUATION D'INTÉGRATION

2.1. Principes de l'intégration

L'opérationnalisation de l'intégration des acquis est réalisée à travers la résolution de situations complexes ou situations d'intégration. La situation d'intégration ou situation problème est dite complexe parce qu'elle constitue un moment de démonstration, de mobilisation et de réinvestissement des ressources pour résoudre un problème proche de la vie courante. En d'autres termes c'est un exercice (devoir, travail, situation problème) donné aux apprenants et qui les amène à réinvestir l'ensemble des acquis de la séquence (chapitre, thème, unité...) pour apporter une solution à un problème en traitant l'exercice qui leur est proposé.

2.2. Les constituants d'une situation d'intégration

Avant de développer les constituants d'une situation, il faut préciser ce qu'on entend par « la tâche » liée à une situation. La tâche est l'anticipation du produit attendu. Elle doit refléter strictement l'énoncé de la compétence.

Une situation est composée de quatre constituants : (1) un contexte, (2) un support, (3) une fonction et (4) une consigne traduisant la tâche demandée à l'apprenant.

(1) **Le contexte** décrit l'environnement dans lequel on se situe.

(2) **Le support** est l'ensemble des éléments matériels, virtuels ou réels présentés à l'apprenant (texte écrit, illustration, photo, etc.) et qu'il doit exploiter pour résoudre la situation-problème. Le support comprend l'information sur la base de laquelle l'apprenant va agir ; selon les cas, l'information peut être complète ou lacunaire, pertinente ou parasite.

(3) **La fonction** précise dans quel but la production est réalisée. La plupart du temps, elle est une fonction sociale.

(4) **La consigne** est l'ensemble des instructions de travail qui sont données à l'apprenant de façon explicite. Elle constitue la traduction de la tâche à réaliser par l'élève. Elle doit être suffisamment claire pour préciser la forme observable sous laquelle la production demandée doit apparaître : sous forme écrite ou orale, sous la forme d'un texte ou d'un schéma, etc.

2.3. La grille de correction

Une grille de correction est un outil d'appréciation d'un critère à travers des indicateurs précis.

En termes stratégiques, la grille de correction répond à un souci de standardisation de la correction. En termes pédagogiques, elle constitue un outil d'aide à la correction des productions des élèves, utilisé essentiellement dans deux buts :

- garantir un maximum *d'objectivité* dans la correction, un correcteur est souvent influencé par une erreur, en rapport avec un critère, qui contamine tout le reste de la correction.
- procurer un *appui aux enseignants/correcteurs* débutants, ou à ceux qui veulent (doivent) changer leurs pratiques d'évaluation : la grille est en quelque sorte un outil de formation et permet à l'enseignant de changer son regard sur la production de l'élève.

Un critère peut être opérationnalisé par plusieurs indicateurs qui se complètent, et qui donnent un tableau assez complet de la maîtrise du critère.

L'indicateur se définit comme étant un indice observable dans la production, un élément concret qu'on peut observer directement. Dans sa formulation, l'indicateur ne doit pas couvrir deux critères différents.

Les critères suivants sont utilisés dans les grilles de correction se trouvant dans les curricula:

- **la pertinence (pertinence)** : la production correspond-elle aux consignes ?
- **l'utilisation correcte des outils de la langue (language accuracy)** : l'apprenant utilise-t-il correctement les outils de la langue (vocabulaire, grammaire, prononciation)
- **la cohérence**: la production est-elle bien agencée ? Est-elle fluide ? Les idées sont-elles à propos?

NB: Il faut noter que l'organisation des critères et indicateurs dans la grille de correction critériée a connu une évolution. Elle se présente désormais sous le format de la grille en annexe.

ANNEXES

EXEMPLE DE SITUATION D'INTEGRATION

Problem solving

Class: première C/D

Thème du mois de novembre: *Modern medicine vs. traditional medicine.*

Compétence terminale 4. *Ecrire un texte simple et cohérent (descriptif, argumentatif, narratif) d'environ cent vingt (120) mots sur des sujets de la vie courante en mobilisant les techniques d'écriture et les ressources linguistiques appropriées.*

You have learnt that your friend is sick and refuses to go the hospital. He says that he does not trust modern medicine. He prefers traditional medicine. According to him, traditional medicine is better. As his best friend, you decide to do something.

To reach your objective, get inspiration from what you have learned in class about traditional and modern medicine, related grammar and vocabulary, and your own experience. In thirty minutes, write a paragraph of 120 words to convince him to go to the hospital. In your paragraph you will:

- give two advantages of going to the hospital for treatment;
- present two problems or risks related to using traditional medicine only.

Use a legible handwriting and avoid deletion!

A. Criteria-based marking grid (grille de correction critériée)

Criteria	Pertinence (Instruction executed)	Language accuracy (grammar, vocabulary and pronunciation)	Coherence (relevance of ideas + logical organisation of the task executed and/or fluent performance)	Refinement (overall presentation)
Instructions				

Instruction 1: Give two advantages of going to the hospital for treatment.	Indicator 1: the learner writes a paragraph. / 0.5 pt Indicator 2: the learner gives two advantages of going to the hospital for treatment. / 1 pt	Indicator 1: the learner uses appropriate grammar / 1.5 pt Indicator 2: the learner uses appropriate vocabulary / 1.5 pt	Indicator 1: the paragraph is well-organized / 1.5 pt Indicator 2: the two advantages of going to the hospital for treatment are relevant. / 3 pts	Indicator 1: The learner's handwriting is legible / 1 pt Indicator 2: The learner's paper does not contain more than three deletions / 1 pt
Instruction 2: present two problems or risks related to using traditional medicine only	Indicator 1: the learner writes a paragraph. / 0.5 pt Indicator 2: the learner presents two problems or risks related to using traditional medicine only. / 1 pt	Indicator 1: the learner uses correct grammar / 1.5 pt Indicator 2: the learner uses appropriate vocabulary / 1.5 pt	Indicator 1: the paragraph is well-organized / 1.5 pt Indicator 2: the two problems or risks related to the traditional medicines are relevant. / 3 pts

TOTAL GENERAL : /20 pts				

CONCLUSION

Le curriculum de l'enseignement post-primaire général au Burkina Faso a été élaboré afin de permettre l'amélioration des pratiques d'enseignement-apprentissage de l'anglais. Il vise aussi à initier et à préparer les apprenants à entreprendre des études secondaires en anglais et à communiquer de manière élémentaire avec des locuteurs de la langue. Pour une implémentation réussie de ces curricula, il était nécessaire d'élaborer ce guide pédagogique. L'exploitation judicieuse du guide par les enseignant.e.s permettra sans nul doute l'atteinte des objectifs de l'enseignement-apprentissage de l'anglais au Burkina Faso.
